

Strategic Oversight Certification

AFTERNOON: 1:30 P.M. – 5:00 P.M.

Or

EVENINGS: 6:00 P.M. – 9:30 P.M

Overview

The need for strategic thinking in every sector (for profit, not-for-profit, charitable, government agencies) has never been greater. Every industry today is experiencing massive disruptive change. Accordingly, surrounded by all this change and turmoil, the single biggest challenge facing Boards of Directors is to oversee both their organization's planning process and management's strategic thinking...amid chaos!... and in so doing help them avoid the costly mistakes that can put their organization at risk and send careers spiraling. In their role as "governors", directors are charged specifically with the responsibility to ensure that their organization's assets are safeguarded and that the best possible decisions are being made by management. Nowhere is ensuring the quality of decisions more important for a board than when it comes to reviewing and approving the strategy of their organization. It represents one of the single most important decision any organization can make.

Program Structure

The Strategic Oversight Role of the Board Program consists of 4 on-line modules of approximately 3.5 hours in duration each delivered live by one of the world's leading strategy and governance experts, Dr. Chris Bart. The program content is applicable to all type of organizations, across all industry sectors and jurisdictions, with a focus on the practical, hands on role of the board in their Strategic Oversight role. Best of all, when you pass the qualifying 'Certification Exam' at the end of the program, you will earn the right to use the prestigious "S.O.C" designation after your name, thereby signalling your commitment to excellence in governance.

Program Outcomes:

Strategic Oversight Role of the Board Program is designed to demystify the “**strategy decision**” for board members. It will especially help you find the **oversight sweet spot** that puts the board on the same team as management while simultaneously allowing them to diligently vet the quality of their management’s strategic thinking.

The program also highlights **the essential principles** of proper strategic planning and showcases how a more **structured strategic management approach** is needed in order to address – and take advantage of – the astronomical changes occurring in the current environment.

A unique feature of this program is that **participants will be required to bring their organization’s current strategic plan to the course** and then use the lessons learned to gauge the quality of their organization’s current **strategic planning readiness**. Along the way, they will also develop a much deeper appreciation and understanding for the importance of having their entire organization **aligned around the strategy**. Finally, participants will be given instruction on the important processes that both raise the quality of a strategic plan and drive employee commitment to its achievement.
